et innovations anticancéres

Structuring action MET'CONNECT

Providing support to scientists
with inquiries related to
tumor metabolism

Submission of the project
to the Scientific Council and Project Manager
Suggestions, Counsel & Solutions

1 month

3 months

In silico metabolic
profiling of
biological samples

Bioinformatics analysis
and integration of
multiple OMICS data

Metabolic phenotyping *in vitro*

For projects requiring qualitative or
quantitative metabolic profile data

Omnilog

YSI 2900

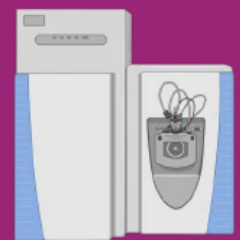

Hypoxic chambers

Seahorse

Facilitated access
to multiomic
platforms

Mass
Spectrometry

Completion of the project in less than 6 months
